

### Padlocks, hasps and bars

SECURE YOUR WORLD

### Company profile

TOKOZ a.s. is a company working in the field of security mechanisms for more than 90 years. Thanks to years of experience we have become real experts on manufacturing of padlocks and today we are the biggest Czech producer in this field.

We have diversified our permanent assortment that includes padlocks and other security components such as bars and hasps or building and furniture hardware and added special security mechanisms and accessories.

It is the area of security mechanisms that we have focused on the most in recent years, and with our new motto

#### **"SECURE YOUR WORLD"**

it is your own world we help to secure!

The products you can find in our current offer involve not only the time-proven and in some fields still irreplaceable TOKOZ products, but also new mechanisms that comply with present-day requirements and provide specific solutions.

#### WITH EVERY STEP WE MAKE, WE WANT TO KEEP CONTRIBUTING TO OUR GOOD REPUTATION OF A STRONG CZECH MANUFACTURER OF LOCKS AND FITTINGS

### How to choose the right lock?

To make security orientation easier the products are marked with a security class and a use pictograms.

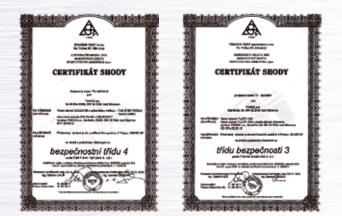

#### Security class

Product	Europo	European standard		SECURITY CLASS				
Product	Europe			2	3	4		
Padlocks	EN	12320	Class 1	Class 2	Class 3	Class 4		
Culindana	EN 4202	key	Class 4	Class 4	Class 6	Class 6		
Cylinders	EN 1303	breaking	Class 1	Class 1	Class 2	Class 2		
Fillings (doors etc.)	EI	EN 1627		Class 2	Class 3	Class 4		

All products are categorized into classes according to their breaking and devaluation resistance.

Classes are indicated on all certified products to make the product selection easier.

#### Certificates

Outstanding quality of TOKOZ PRO products is also proved by product certificates from independent accredited testing laboratories.

We use the following accredited testing laboratories to certify our products: SZU Engineering Test Institute, Brno, TREZOR TEST s.r.o., Klecany.

#### Our products are certified in accordance with three standards:

**EN 1627** – defines product resistance to e. g. drilling, lock picking, wrench, bumping, brute force, etc.

**EN 12320** – specifies requirements and describes testing methods for strength, security, functionality and corrosion resistance in padlocks and their accessories

**EN 1303** – this European standard sets forth the requirements and testing methods for classification of cylinders from the functionality and security standpoints

TOKOZ products are mainly intended for external use since they withstand extreme climatic condition over a long period of time. In support of our claim is also the fact that our products undergo tests in a salt-spray cabinet and conditions the standards for given products severalfold. Detailed information on resistance is given with each product.

### Packaging

Note: order details are included in the price list

For bulk orders, the packing can be adapted according to customers wish.

### Golem – padlock

# A padlock honouring its name!

l I I

24018

GOLEM 70

GOLEM products are among the most secure on both Czech and international market. Massiveness and high level of security predetermines these products to secure large facilities and valuable objects.

- > the padlock body is made of chromium manganese hardened cement steel resistant to brute force, drilling and destruction
- > covered hardened shackle with improved resistance to cutting, sawing and prying
- > both-side-secured shackle revolves by 360° after unlocking
- > GOLEM 70 mechanism locked by rotating discs, is resistant to bumping, lock picking and drilling, and provides reliability in case of extreme climatic conditions
- > GOLEM G60 together with security cylinder and GUARD, resistant to drilling and hook picking, is our regular offer
- > GOLEM G60 is compatible with systems KABA and GEGE as well, we supply it even without the cylinders
- > Golem G 60 Long tested by TOKOZ a.s. corporate service, cerfitied in Security Class 3 in compliance with EN 1627
- > the key can only be pushed in and pulled out when the padlock is locked
- > extremely secure set is Golem 70 and BP GOLEM

### Alfa – padlock

# Even common security deserves quality!

Both design and production of the ALFA padlocks aim at substantial manufacturing and user benefit. They are suitable for both interior and exterior, for securing various doors, locker rooms, lockers, basements, huts and other sites. Upon meeting the maintenance conditions, long term lifespan is guaranteed even in exterior (use silicon based lubricant once a year).

- > offers the possibility of the Keyed Alike systems with Pluto 40, Alfa 50 and Alfa 40
- > cylinder is resistant to pulling out
- > massive cast zinc padlock body is resistant to brute force and destruction
- > HARDENED shackle with improved resistance to cutting, sawing and prying
- > both-side-secured shackle revolves by 360° after unlocking
- > the shackle pops open after unlocking
- > padlock locks by pushing the shackle in
- > the key can only be pushed in and pulled out when the padlock is locked

### Beta and Kappa – padlock

#### Our silver fixed star

50

BETA

A

These padlocks belong among the low cost padlocks on the local market. However, the quality of manufacturing, modern design and user friendliness makes them unique. They are suitable for both interior and exterior use, for securing various doors, locker rooms, lockers, basements, huts, luggage, suitcases, etc. Upon meeting the maintenance conditions, long term lifespan is guaranteed even in exterior (use silicon based lubricant once a year).

> solid brass body of BETA line products guarantees high resistance to corrosion, satin nickel surface finishing

39417 BETA 50 LONG

A

- > stainless steel body of KAPPA line products is resistant to brute force as well as corrosion
- > chromium hardened shackle of BETA line products proves greater resistance to cutting, sawing and prying
- > stainless steel shackle of KAPPA line products is highly resistant to sawing
- > both-side-secured shackle revolves by 360° after unlocking
- > the shackle pops open after unlocking
- > padlock locks by pushing the shackle in
- > padlock can be locked even without the key

## Delta – code padlocks

# Do you forget your keys or just don't like carrying them with you?

Delta line code padlocks present an ideal solution for securing doors, locker rooms, lockers, gates and even vending machines. The small version of the padlock is a good helper for the road.

## Extreme, Herkules, 113/50 Record and 114, 112 – padlocks

#### Massive, traditional, excellent!

Padlocks with unique locking mechanism solution developed for the specific needs of the market – enhanced resistance to weather conditions, bumping and other methods of lock picking. The original key constitutes a part of this solution. Suitable for both primary and supplementary security of various external gates, doors, minor sites (sheds, residential containers), external cases (distribution points). Maintenance by silicon based lubricant is recommended once a year.

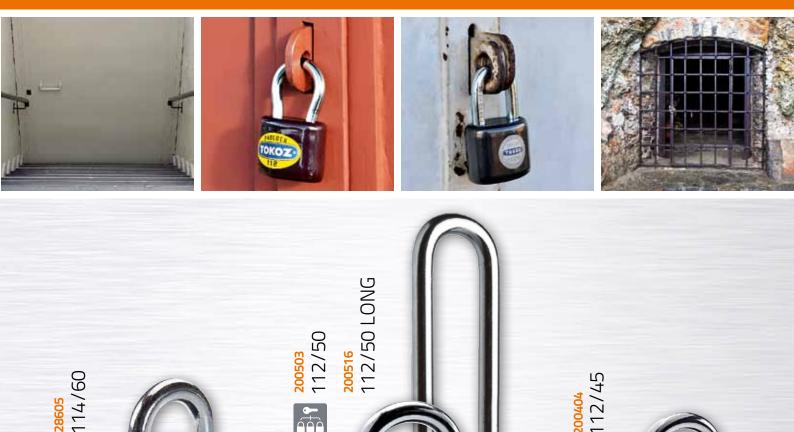

201930 RECORD 113/50+ (3 keys) 201931 RECORD 113/50+ (6 keys)

- > rotating discs mechanism is resistant to bumping, lock picking and drilling, and guarantees reliability in extreme climatic conditions.
- > special safety pin secures the internal mechanism against spontaneous revolution of the rotating discs, and enables to secure vibrating equipment
- > steel body is resistant to brute force
- > HERKULES ø 10,5 mm shackle is a massive hardened steel cast
- > multiple point shackle attachment guarantees maximum resistance to wrench
- > removable shackle makes manipulation in less accessible places easier
- > HERCULES impact protection of locked objects by rubber cover on the body of the padlock
- > HERKULES colour variants (black, red, green, blue, yellow)
- > 112/50 we also offer it in a long shackle variant

### Zeta and Emotion – padlock

#### We all have our secrets

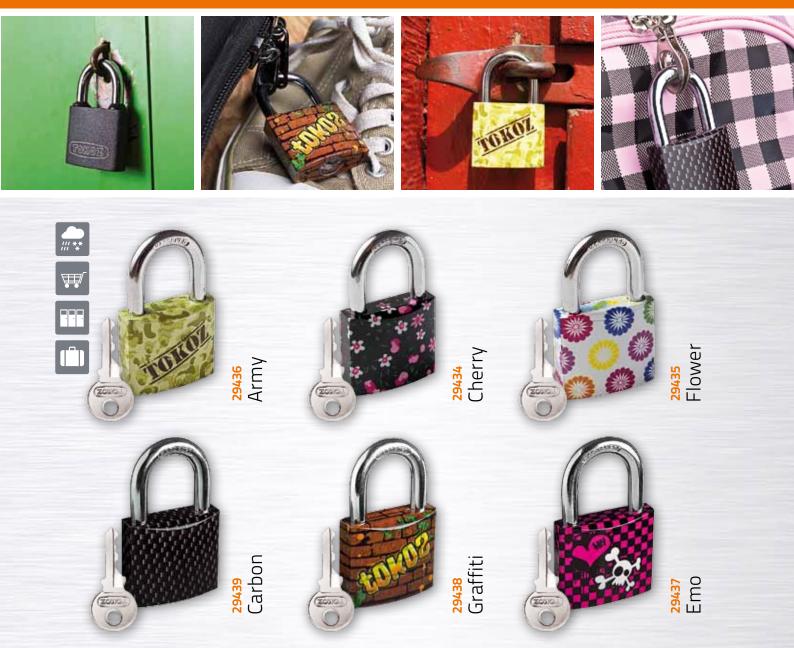

Padlocks of the Emotion product line are unique for their timeless design and are designated mainly for securing lockers and locker rooms in schools, sports facilities, leisure time clubrooms, and thus for anyone enjoying unconventional and imaginative things. ZETA padlocks in sizes 30 to 60 are suitable for standard security of basements, gates, cottages, and other premises.

- > Emotion steel 40 mm body with colour printing
- > Zeta steel padlock body with black surface treatment
- > After unlocking the shackle revolves by 360°
- > Shackle pops out after unlocking
- > Zeta shackle is equiped with covers for protection against pollution
- > Padlock may be locked without a key

### Unification set

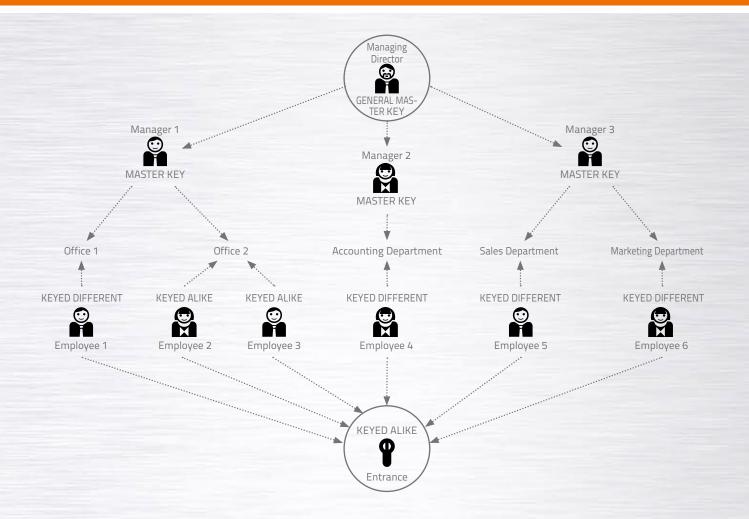

The basic unification set contains rotating discs for selected TOKOZ padlocks and for related components.

Purchase order number: 22202

Manual with precise description of padlocks and their components is an integral part of the offered set. It depicts the assembly and disassembly of padlocks in a great detail, and thus simplifies the entire cylinder unification process of selected TOKOZ products.

## Systémy klíčů

The purpose of locking systems is to create a functional system of superior and ordinary keys according to access rights, and thereby reduce the overall number of keys carried by individuals to a minimum.

Selected TOKOZ products are manufactured to be fitting even into keyed systems of other brands. We supply them both with a cylinder (e.g. FAB, GUARD) and without, prepared to be attached by a locksmith. With this we wish to satisfy our customers and enable a single key unification of our padlocks and bars with their door cylinders.

#### **Keyed Different system**

Every lock has its proper key that cannot operate other locks.

#### **Keyed Alike system**

More than one lock can be opened with the same key.

#### Master Keyed system

All locks are keyed to a specific key that unlocks only the relevant lock. A relevant group of locks can be then opened with a master key according to the access rights (e. g. employees have their own keys and their boss has a master key that can unlock his/ her own office and also offices of the employees but it will not unlock offices in other sectors).

#### General Master Keyed system

One key operates all locks in the company. It is superior to master keys. It is intended for the use of the owner of the company, security agency and fire brigade. It can also be placed within the company premises in a sealed safety box for emergency cases.

### SAFE COUNTRY

#### SAFE COUNTRY PROJECT

The purpose of the Safe Country project is criminality prevention and protection of property and people in our country.

It joins together the members of Mechanical Lock Systems Association (CMZS-ČR), i.e. companies, corporations and self-employed persons providing products and services in the field of mechanical security, who have decided to unite and take action in order to create a 'safer" country, the Czech Republic.

The places of business as well as the products of members of the association may use the Safe Country marking. Tokoz, as a member of CMZS and a producer of security mechanisms, also takes part in the project. The company engages in active cooperation with other members and partners of the project.

www.cmzs.cz

#### Partners of the project

Ministry of the interior of the Czech Republic

Chamber of Commerce

Police of the Czech Republic

Mechanical Lock Systems Association

### Notes

## KEYED ALIKE SYSTEM GENERAL AND MASTER KEYED SYSTEM

Another strength of the **TOKOZ PRO** locking system is its safety catch. After regular locking, the key is revolted in the lock by another 90° and back, putting the safety catch on. When unlocking, the safety catch is not released by simply inserting the key, as you do in regular lock cylinders, but rather the lock's safety catch needs to be released by turning the key by the same 90°, and only then the lock may be unlocked.

#### TOKOZ PRO

The TOKOZ PRO product line is built around the unique lock cylinder inspired by the lock mechanism of our padlocks. The basic concept of the lock mechanism has been made over into a structure applicable even to lock cylinders. Unification of locking mechanism of our products, integration into various keyed systems and interconnection with lock cylinders were the reasons for our decision to start producing lock cylinders.

#### SECURITY MECHANISM

We have diversified our permanent assortment and added security mechanisms and accessories. Therefore, the products that you can find in our current offer involve not only time-proven and still irreplaceable TOKOZ products but also new mechanisms that have been adapted to present-day security needs, plus they provide specific solutions.

ATTENTS

#### **BUILDING FITTINGS**

The building fittings offer is focused on fittings for double paned wooden windows, which are still used in some of the houses or recreational buildings. Other products include special features for fittings, which not only enhance the window comfort when being operated, but may also serve as security measures.

#### **FURNITURE FITTINGS**

In Furniture fittings, we still offer the typical TOKOZ products. Alongside the basic components, such as connecting fittings, various hangers, small hooks or magnetic catches, there are even specialties increasing the utility value of furniture.

#### CERTIFIED SYSTEM OF QUALITY CONTROL

ISO/TS 16949:2009 ISO 9001:2008 ISO 14001 ČSN OHSAS 18001 Solvency certificate
